Teleena Nederland

About Teleena

Teleena is a young and innovative company in mobile telecommunications. We operate our own mobile core network combined with a state-of-art IT infrastructure and are using the radio networks of licensed mobile operators (MNOs). At this moment we have radio network access agreements with Vodafone Netherlands and Vodafone United Kingdom and we are exploring radio network access agreements in other countries.

We enable companies and brands to launch their own mobile services. We offer these 'MVNOs' (Mobile Virtual Network Operators) innovative mobile solutions such as mobile loyalty, multi country SIM cards and fixed/mobile solution in prepaid, postpaid and hybrid propositions. Currently we work with almost 50 people in two countries and operate 16 brands, including smart mobile brands like Telesur, UPC, DekaMarkt and hollandsnieuwe. We keep on expanding in customers and countries. The standard is high and we work hard with passion.

The company has seen tremendous growth and for the further growth of our market and to support the building of our organization Teleena is looking for a **Senior IP & Mobile Network Specialist** for our Headquarters in Nieuwegein, The Netherlands.

About the job

The specialist will work in the Network & Services team. This team is responsible for all network related operational and development tasks. The carrier grade core network exists of HLR, IN, STP's voice gateways, GGSN, routers, switches, voicemail and various network management systems. It has interconnects with various national and international voice, GPRS and signaling operators and MVNO's.

Tasks and responsibilities

- IP design, implementation and maintenance
- Acting as the expert and knowledge center for all IP related items
- Network monitoring development capabilities
- Further develop the Teleena network monitoring system and network security
- Support the rest of the Network & Services team

About you

- A minimum of 5 years' experience in (mobile) telecommunications is required
- Good knowledge of protocols: BGP, OSPF, IPSEC
- Extensive real business experience with IP networks (switching/routing/security)
- Broad experience with Cisco IOS (at least CCNP level)
- Hands-on and eager to learn
- Excellent communication skills
- Bachelor degree in telecommunications, IT, Computer Science, Programming or Business Informatics

We offer

- A challenging work environment with (inter)national customers/suppliers
- A professional organization with great people to work with!
- Possibilities to gain broad mobile network experience
- Possibility to grow to management level
- Opportunities to make a difference, to develop and grow

This is an excellent long-term opportunity for a candidate to be involved in a constantly evolving dynamic organization operating in a sector that is continuously experiencing high growth.

Location

This is a NL based position. Our head office is located in Nieuwegein, The Netherlands.
